Bring optimized solutions

TECHNOLOGY TRENDS AND OUTSOURCING MARKETS

Technology changes every minute in a flat economy. To name some dominating trends in 2017 and possibly forward, the Internet of Things (IoT) has been on just about everybody's list for years for its ability to connect all our devices together, making them sing in a glorious technological harmony. Artificial Intelligence (AI) is another name to call, delivering more engaging experiences to customers, and providing better service, as well as better business decision making.

Asian markets are emerging to lead global outsourcing trend. Vietnam, unexceptionally, proves to be an ideal destination of outsourcing and spin-off for global technological giants.

ENABLE STARTUP

Enable Startup Company Limited is a Vietnam-based SME with 11-50 developers, and designers. We provide outsourcing services to help startups and SMEs within affordable budgets.
