JD - Mobile App Developer Internship

We are looking for a Mobile App Developer Intern who is passionate about building real-world applications and delivering features end-to-end. You will work closely with experienced engineers to develop mobile applications, integrate APIs, and solve real product challenges..

Hello! Let's get to know each other!

Enable Startup is a one-stop IT solution provider based in Da Nang, Vietnam. Founded in 2016 on genuine passion for technologies, we have since then embarked relentlessly on 50+ projects with 30+ global businesses of all shapes and sizes across 12 countries. Those challenging yet rewarding endeavors have honed our technical skills to fulfill world-class standards, while complementing our delivery capacities with solid industrial know-hows and best practices.

We provide startups and enterprises with tailor-made solutions that cover the gamut: from IT consulting to full-service software engineering execution and custom product development. Learn more about our services

Responsibilities

- Develop and maintain mobile application features (UI + logic)
- Integrate mobile apps with backend APIs
- Handle data flow between mobile app ↔ backend services
- Debug and fix issues across UI, API, and data handling
- Collaborate with designers, backend engineers, and product team
- Continuously improve app performance and user experience

Requirements

- Basic knowledge of Kotlin and Android development
- Familiarity with:
  - Android Studio
  - Activity / Fragment lifecycle
- Understanding of:
  - REST APIs

📍 3rd Floor, Quang Dong Tower, 108 Nui Thanh St, Hai Chau District, Da Nang City, Viet Nam

Page 1

       ○ asynchronous programming (coroutines / callbacks)

- Ability to build basic UI screens and integrate APIs

- Familiarity with **Git**

- Strong problem-solving mindset and willingness to learn

Nice to have

- Experience building Android apps (personal / school projects)

- Understanding of:

       ○ state management

       ○ local storage (Room, SharedPreferences)

- Experience handling API errors and edge cases

- Basic UI/UX awareness

What we are really looking for

- Can debug when things don't work as expected

- Can read and understand existing code

- Learns quickly and adapts to new problems

- Takes ownership and completes tasks

Benefits

- Work on real Android applications

- Mentorship from experienced engineers

- Fast-paced and learning-focused environment

- Potential for full-time employment after the completion of the internship.

The recruitment process would be short and sweet!

If you are excited about learning and growing as a Mobile App developer, we encourage you to apply for this internship. We look forward to hearing from you!
