

## JD - Web Developer Internship

We are looking for a Web Developer Intern who has strong logical thinking and a solid understanding of how web systems work. This role is not about knowing a specific framework, we care more about your ability to understand data flow, debug issues, and build real features.

### Hello! Let's get to know each other!

Enable Startup is a one-stop IT solution provider based in Da Nang, Vietnam. Founded in 2016 on genuine passion for technologies, we have since then embarked relentlessly on 50+ projects with 30+ global businesses of all shapes and sizes across 12 countries. Those challenging yet rewarding endeavors have honed our technical skills to fulfill world-class standards, while complementing our delivery capacities with solid industrial know-hows and best practices.

We provide startups and enterprises with tailor-made solutions that cover the gamut: from IT consulting to full-service software engineering execution and custom product development. Learn more about [our services](#)

### Responsibilities

- Collaborate with the development team to create and implement innovative solutions.
- Write clean and maintainable code.
- Debug and troubleshoot issues in existing codebase.
- Collaborate with other team members to develop and maintain high-quality software products.
- Stay up-to-date with new trends and technologies.

### Requirements

- Good understanding of **web fundamentals**
  - HTTP / API
  - Request–response lifecycle
- Basic knowledge of at least one backend language:
  - Node.js / PHP / Python
- Understanding of:
  - Databases (SQL/NoSQL)
  - Basic system design (how data flows in a system)

- Familiarity with **Git**
- Strong logical thinking & problem-solving mindset
- Ability to learn fast and work independently
- Basic frontend knowledge (HTML, JS) to understand full flow

#### Nice to have

- Experience with any backend framework (NestJS, Laravel, Express, etc.)
- Experience building personal projects

#### What we are really looking for

- Can explain how a feature works end-to-end
- Can debug when “something doesn’t work”
- Doesn’t rely blindly on AI or copy-paste
- Curious and willing to dig into problems

#### Benefits

- Learn how real-world systems operate.
- Work with an experienced team of developers.
- Opportunity to work on real-world projects.
- Potential for full-time employment after the completion of the internship.

#### The recruitment process would be short and sweet!

If you are excited about learning and growing as a Backend/Web developer, we encourage you to [apply](#) for this internship. We look forward to hearing from you!
